PUGLIA - ANDRIA - PROVINCIAL ROAD ANDRIA BISCEGLIE Industrial building land for sale in Andria: project approved for a data center in the heart of Puglia In the dynamic region of northern Puglia, along the strategic provincial road connecting Andria to Bisceglie, we offer for sale a plot of land suitable for industrial and commercial use, spanning over 21 hectares. The land is already fully developed and includes an approved project for the construction of a modern production complex. This property stands out for its extraordinary features: full authorization—municipal, regional, and national—for the construction of a large data center, the first of its size in Southern Italy and one of only a handful nationwide. The completely flat lot is immediately suitable for construction, with no need for leveling. The approved project includes ample parking, green spaces, and a versatile structure designed to accommodate industrial, logistics, or advanced technology activities. Having all the necessary permits for a data center represents a rare and strategic opportunity for IT operators and digital infrastructure investors. The city of Andria, due to its location and infrastructure, is the ideal hub for highly efficient operations: equidistant from the Adriatic Sea and the Murgia plateau, close to Puglia's main roadways and well-connected to the rest of Italy, it is located in a highly entrepreneurial area, with a developed and constantly evolving production ecosystem. The surrounding area is populated by businesses operating in the agri-food, mechanical, and service sectors, making this location an ideal base for innovative and highly profitable projects. Investing in this property means seizing a unique opportunity to build a high-value facility in a forward-looking region focused on technology, efficiency, and sustainable growth. Contact us now for more information and to discover how to transform this opportunity into a concrete, high-return project.
